Respected Sir/Madam,

The Department of Computer Science and Engineering of Nitte Meenakshi Institute of Technology, Bangalore, has been conducting annual national level Hackathons since the year 2015. We've received immense recognition and participation since then. This year, we are thrilled to announce that the latest edition of our Hackathon, "**NMIT Hacks 2021**", will be held on the **20th and 21st of February, 2021**. We are delighted to invite the students of your college to take part in this online event, as the top winning teams will stand a chance to win prizes worth **INR 75,000**.

NMIT Hacks is an open hackathon, which encourages coders to give creative and innovative solutions to the problem statement of their choice in any domain within a limited period of **24 hours**. The evaluation will be based on the functionality of their prototype and innovative use of technological and creative skills which will be carried out by distinguished personalities from both Industry and Academia.

Previously, we've received wonderful responses and enthusiastic participation from students of various premier institutes of India with over 900 registrations and 190 idea submissions, spanning various cutting-edge and newly emerging domains of technology.

We request you to encourage your students to actively participate in this event. It will be a wonderful learning experience for enthusiastic coders and student developers to later establish themselves in the competitive field of technology and entrepreneurship. Amidst the race for bagging prizes, it would also improve their problem-solving capabilities and coding skills. This event will provide an opportunity for the students to connect with like-minded people, professionals, and industry experts.

We're looking forward to active participation from your esteemed institute.
